A BOUTIQUE OF FINE HANDCRAFTED ARCHTOPS

BACK IN THE FIBONACCI GUITARS WORKSHOP!

We have been soooooo busy in the workshop that we have neglected producing our Newsletters for a couple of months. But building guitars has to take priority over writing about them. Smething that we are sure our customers would agree with! Anyway, here are some pictures of guitars that we have been working on recently.

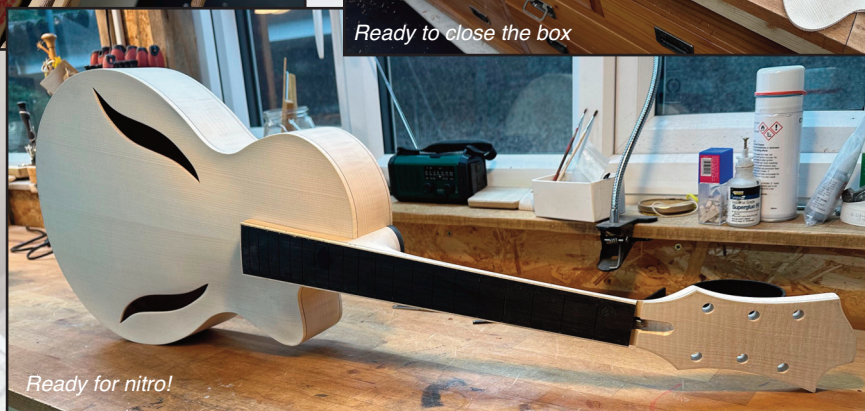

Here are some work in progress pictures of a lovely little Chiquita that we thought we would share with you. This is a custom nylon string build, 12th fret neck joint, 585mm scale length and will be fitted with Barbera transducer.

Carving

Ready to close the box

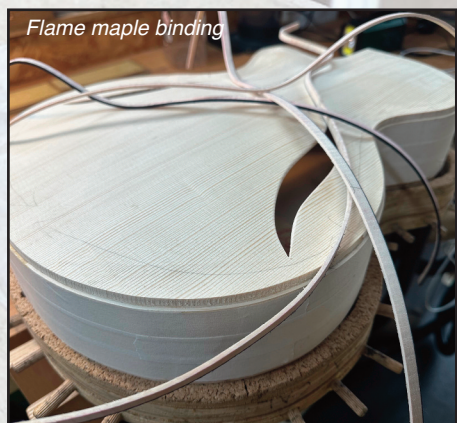

Ready for nitro!

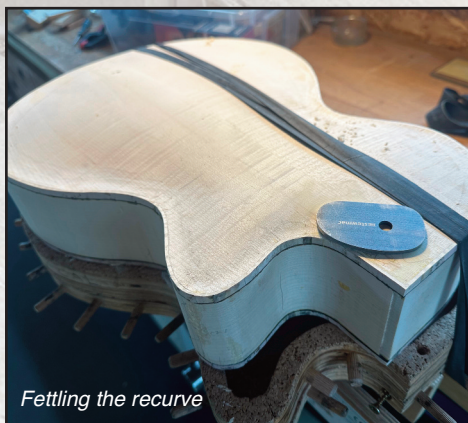

Our neck joints are laser guided!

And did we ever mention that we build left handers with no up charge on price? Well we've been working hard, beavering away on this little LH Chiquita almost ready for neck join.

Flame maple binding

Fettling the recurve

LH Chiquita ready for neck

You can find more information on our Chiquita model on our website here:

We post regular updates on social media but were asked recently to share updates on our NEWS BLOG page on our website for anyone who does not use Facebook, Instagram. So please subscribe to our NEWS BLOG on our website for regular updates on everything that is happening at Fibonacci Guitars. <https://www.fibonacciguitars.com/newsblog>

More information on all of our guitars here:
