

A BOUTIQUE OF FINE HANDCRAFTED ARCHTOPS

FIBONACCI AMBASSADOR

We would like to introduce you to the Fibonacci Ambassador - Our newest release.

The Ambassador is a beautiful archtop in it's simplest, most understated form. No bling, no fancy inlay on the fingerboard, no quirky headstock. Just a very simple design aesthetically, with the main focus being on its performance.

Ambassador oil finished by James Millman

As standard, the Ambassador is formed from a parallel braced, hand carved AAA spruce top, and hand carved AAA flame maple back and sides. It is fitted with a maple neck, dove-tail jointed at the 14th fret, 14" radius ebony fingerboard, with 20 Jescar EVO gold frets. Peripherals are hand profiled ebony finger-rest, tailpiece, and floating bridge with bone saddle.

Simple elegant design

The Ambassador can be finished in nitrocellulose lacquer or custom finished by acoustic builder, James Millman using his secret Devon, guitar oil mix. Either way, the result is perfection, retaining the natural aesthetics and the responsive acoustics of the guitar. The Ambassador archtop is something very special, and sounds every bit as good as it looks.

A choice of floating or set-in pickups

The Ambassador comes fitted as standard with a floating Kent Armstrong humbucker. But it can be fitted with a floating Dickinson, KRIVO humbucker or a set-in an OX4 handwound humbucker, with a hand profiled ebony pickup ring. But, as I am sure you can appreciate, everyone has their own taste when it comes to pickups. Therefore, we can explore the option of custom fitting any particular pickup should you have a personal preference. We are also pleased to offer alternative exotic tone-wood custom builds if required.
