

A BOUTIQUE OF FINE HANDCRAFTED ARCHTOPS

THE FIBONACCI FIBONACCI

It is a long story why we named our latest release the Fibonacci Fibonacci. Perhaps it is just because it is such a wonderful guitar, one feels the urge to say its name twice. Or perhaps it is part of a cunning marketing plan that encourages the reader to stop and think... 'ah ha, they made a typo error'. But whatever the reason, its name does not take anything away from this beauty.

Just in case you hadn't noticed, the Fibonacci Fibonacci, has an obvious influence in aesthetic design from a very well known guitar builder (answers on a postcard!). But when you pick it up and play it, and you will realise immediately, that this is a very different guitar altogether. It feels light but well built, with all the hallmarks to let you know you are hold a high quality instrument.

*Hand Carved,
Mahogany Back & Sides*

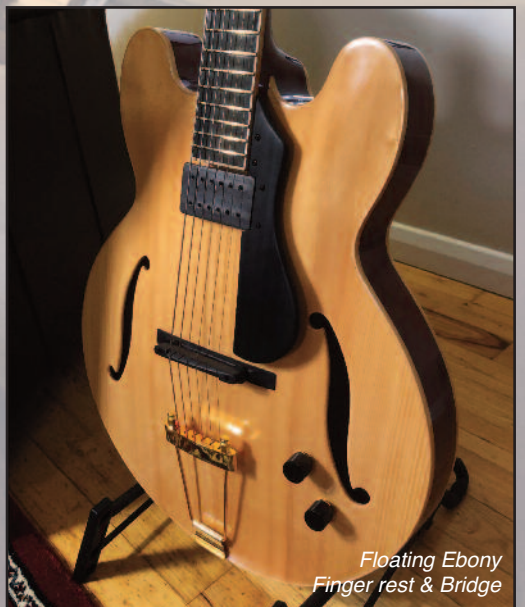

*Hand Carved,
Double Cut-away*

Floating KRIVO Pickup

The Fibonacci Fibonacci is a completely hollow, double cut-away archtop, with 16" lower bout, 56mm deep body, produced from a hand carved AAA spruce top, with hand carved mahogany back and sides, and neck, 22 Jescar EVO Gold frets, 17th fret neck joint. It is complimented with solid maple binding, ebony fingerboard and floating pickguard. We have opted to fit the Fibonacci Fibonacci with a gold, floating trapeze type tailpiece as standard, but a floating ebony one can be fitted if preferred.

The Fibonacci Fibonacci comes with a single floating 'Micro Stealth' Krivo pickup, which packs plenty of punch, while sounding well balanced and articulate. Krivo, are critically acclaimed, innovative boutique pickups for working musicians, personally hand made by Jason Krivo Flores in Portland, Oregon USA. If you haven't already done so, check them out. The Fibonacci Fibonacci is beautifully finished in nitrocellulose.

*Floating Ebony
Finger rest & Bridge*
